New Taipei City, Taiwan | (+886)976 392 711 | [linkedin.com/in/charles-kao](https://www.linkedin.com/in/charles-kao) | [github.com/mato1321](https://github.com/mato1321)

## Education

---

**Soochow University**, B.S. in Information Management Sept 2023– Jun 2027

## Experience

---

**Soochow University**, IT Support Assistant Sept 2023– Now

- Supported campus computer systems through OS setup, hardware troubleshooting, and software deployment.

**Soochow University**, Teaching Assistant of Computer Programming I & II Sept 2023– Jun 2024

- Served as the first freshman teaching assistant in the course's history, provided technical guidance on JAVA programming concepts, debugging, and exam problem solving for 60+ students per semester.

**Soochow University**, Teaching Assistant of Computer Programming I & II Sept 2025– Jun 2026

**Soochow University**, President & Speaker of Artificial Intelligence Applications Club Jan 2026 – Now

- Taught Git/GitHub workflows and guided members in building personal resume websites with GitHub Pages.
- Organized a NextWave AI Legal Hackathon promoting cross-disciplinary applications among universities.
- Managed club operations, invited industry speakers for technical talks, and organized company visits.

## Projects

---

**Openbrowser (100+ stars) Contributor** [github.com/Openbrowser](https://github.com/Openbrowser)

- Designed the skill.md schema for LLM agent planning, reducing tool execution hallucinations.
- Contributed to CDP-based autonomous browser agent framework supporting end-to-end web task automation.
- Actively contributed to feature development, issue discussions, and community collaboration.

**Guide Glasses for the Visually Impaired Team Leader** [github.com/guide\\_glasses\\_project](https://github.com/guide_glasses_project)

- Used YOLO (Roboflow, Ultralytics, OpenCV) for real-time object detection and segmentation in smart glasses.
- Built a FastAPI face recognition system using InsightFace with cosine similarity for real-time identity matching.
- Served as team leader, resolved bugs, and developed a Kotlin frontend framework for team integration.

**Healixir** [github.com/Healixir](https://github.com/Healixir)

- Developed a multi-dimensional scoring algorithm for personalized supplement recommendations.
- Built a full-stack system with React, FastAPI, and PostgreSQL for secure user management.
- Built a pharmacy-based supplement recommendation system using cosine similarity and questionnaires.

## Awards

---

- 2024 Northern Seven Universities Programming Competition – Honorable Mention
- 2024, 2025 National Collegiate Programming Contest (NCPCC) – Represented the school in the finals.
- 2024, 2025 Soochow University Dept. of Information Management Programming Contest – 2nd Medal
- 2025 PSBH Problemthon & Solveathon Global Challenge – Honorable Mention
- 2025 NextWave AI Legal Innovation Hackathon Competition – 3rd Place [github.com/law\\_hackthon](https://github.com/law_hackthon)
- 2026 Soochow University Dept. of Information Management Programming Contest – 1st Medal

## Tech Stack

---

Java, Python, C, TypeScript, AWS, React, Vite, FastAPI, PostgreSQL, Docker, Linux, Nginx, Figma, Git
